Espar's Hybernator in frame system enables installation of our Hybernator between the frame rails or without the drilling of frame components. This dramatically increases affordability by reducing installation time and complexity. The system still provides engine-off heat to the cab, the engine, and the fuel system using the Espar Hydronic 5 coolant heater. Drivers stay warm and safe and are assured quick engine starts when it's time to get back on the road. This system meets every demand of Fleets and Owner Operators across North America. A number of different operating switches exist to meet individual demands.

Hydronic 5 specifications	12/24V
Heating Output - BTU/hr	8,200 - 17,000
Electrical Consumption - Amps	1.9-4.2/.95-2.1
Fuel Consumption - gal/h	0.08 - 0.16
Weight - lbs	6.4
Dimensions - inches (l x w x h)	8.6 x 3.5 x 6.2
Hybernator in frame specs.	
Weight - lbs	179
Dimensions - inches (l x w x h)	26 x 13.5 x 11.8
